EVERGREENS, SHRUBS, BULBS AND GREENHOUSE PLANTS

CAMELLIA JAPONICA

The Camellia is the handsomest and finest of all the broad-leaved evergreen blooming plants for Southern Gardens. It is long lived and its beauty and monetary value increases rapidly as the plants grow older. The many new and fine varieties of recent introduction have added enormously to its popularity and its use as an aristocratic cut flower has greatly enhanced it and opened a much broader field for its distribution.

Camellias are easily grown in the South; their glossy green foliage all the year round together with their most attractive and beautiful flowers in Winter, make them unusually attractive, when no other flowers are to be found in the garden. This has increased the admirers of this plant. Millions of them are set out every year in open ground, or in conservatories as pot plants. They will regain, without doubt, their popularity stronger than they possessed a half century ago.

CULTURAL HINTS

The Camellia grows in almost any soil, but well drained, good garden soil, a little acid in reaction is more satisfactory.

A half shady location is preferable, especially when the plants are young. Free blooming cannot be expected in deep shade.

The Camellia is a gross feeder; responds well to fertilization at the time of planting; if the soil is not rich enough, use a mixture of one-half garden soil, one-fourth well rotted cow manure and one-fourth peat or leaf mold. Every Winter or early Spring apply well rotted cow manure, bone meal or cotton seed meal, or similar commercial fertilizer may be added if necessary. Mulching with half rotted leaves or peat is beneficial.

The Camellia loves a humid atmosphere. Do not neglect watering. Frequent syringing on the leaves helps a great deal during hot Summer months.

Red Spider and various scales may attack Camellias. We use Nursery Volck at the ratio of 1 to 50 for Summer spray. Thorough spraying twice a year controls these pests satisfactorily. The strong sun has to be avoided after spraying as it may cause the leaves to burn.

NAMED VARIETIES

For many years we have devoted much of our time and care in the production of Camellias. Our tireless efforts have been rewarded. We are proud to offer to our customers this year a number of the finest varieties that are still scarce on the market today.

Since it is generally recognized that considerable confusion exists with regard to correct names of the different varieties our listings are made to agree with the best authorities available on named varieties.

GOLD MEDAL VARIETIES

II Tramento. (Laurel Leaf)—Largest of the double-flowering Camellias. Some flowers are deep pink, others pink with white spots. 8 to 12 in. grafted, B&B	12 to 18 in. grafted B&B 5.00 18 to 24 in. grafted B&B 6.00 Victor Emanuel—Most highly prized Camellia of today. 30	to	36	in.	grafted	B&B	15.00

CLASS 1

This class consists of the better known fancy varieties of Camellias and will be found highly desirable for any planting.

Akebono—A semi-double salmon pink flower, exquisite formation, petals stand apart. Dark green, glossy foliage, bushy growth. Mid-season flowering.

Alba Pleno—Snow white of very double, good size flower. Very early, but slow grower. A very early blooming variety.

Chandlerii Elagans—Semi-double to double, flower very large, pink variegated with white, peony form mixed with yellow stamens. Bush of open habit of growth and with long dark green slightly twisting leaves.

Chandlerii Elagans (Red)—Same as above except bright, cherry-red flowers.

Cliveana.—Large peony-form; bright pink. Very free bloomer for large kind. Strong upright grower; foliage medium, large and bright green. One of our best.

Herme.—Very large, loose peony form of elegant shape. Pink and red variegated with white margin. Compact upright grower with good foliage; free bloomer.

Monarch.—Deep pink flowers of enormous size, having many clusters of stamens and petals, inside of larger outer petals, making a single flower equal to a bouquet. Beautiful foliage and compact grower.

Mrs. Abby Wilder.—Peony shaped white flowers, medium to large, with splashes of pink. A good upright, fast, compact grower with medium green leaves.

Pink Perfection.—Blooms very early with double clear shell pink flowers; petals symmetrically arranged. A free bloomer. A compact grower with leaves of medium green. This is one of the most popular varieties.

Pope Pius IX.—(Prince Eugene Napoleon; Carlotta Grissi; Mad. Lebois; Floreplena Atrorubens; Imbricata Rubraplena)—A large full double, blood red, imbricated flower, opening early and continuing until late, being excellent for cut flowers. The bush is of tall, compact upright growth. This Camellia is considered by many as the very finest double red.

Prince Albert.—While we think this is the same as Herme. We have plants propogated from original bush at Fairhope.

Prof. C. S. Sargent.—Very thick peony of solid crimson; medium size. An early flowering, highly desirable Camellia of tall, very rapid, open growth with dark green round foliage.

CLASS 2

The Camellias in this class, although more plentiful than those in class one, are really very desirable and should not be considered inferior in any way.

Caleb Cope (Clarmont)—A medium sized double, soft pink, with center petals incurved. A rather compact grower with light green leaves with edges slightly curled.

Cheerful.—Cheerful in name and color. A bright, cherry-ned, very double, high-pointed center. This variety blooms while very young and usually has a few flowers open by Christmas. This bush is a tall, fast, rather compact grower with medium sized dark green leaves.

Earl of Castleberry.—A large, cerise colored Camellia with large outer petals and smaller fluted petals in center. Large glossy, green foliage. A very strong grower.

Jarvis Red.—Deep blood red, large size semi-double flower with exceedingly beautiful golden yellow stamens. Blooms in midseason and sets buds when young. Narrow and somewhat crinkled dark green leaves. A spreading and thrifty grower.

Miss Dora McCarthy.—Large single white flowers with vellow stamens. This is the best single white Camellia we have seen. A fast upright habit of growth with rather large deep green foliage. Nobilissima.—Creamy white medium size semi-double flower, slightly peoni-form, with golden anthered stamens interspersed with petaloids near the center. Blooms early and sets buds when young. Roundish light green leaves, some variegated. A spreading, thrifty grower.

Red Downing.—A brilliant rich red with golden yellow stamens clustered in the center, is semi-double and flowers in mid-season. A slow growing bush with rather small, medium green leaves.

Rev. John Bennett.—Deep salmon-pink, center petals interspersed with showy yellow stamens. An upright grower with dull green foliage, and mid-season bloomer.

T. K. Variegated.—This is a semi-double bright pink striped with rose showing beautiful yellow stamens. It is a fast, tall grower with dark green leaves.

CLASS 3

In this class we are listing a few of the old favorites. No Camellia garden is complete without these varieties.

Bealie Rosea.—A double clear pink white when opening, resembles a rosebud; a midseason bloomer. The bush has a round, compact habit of growth with small light green leaves.

Colonial Pink.—Frequently sold as Glorie de Nantes, but they are not the same. The flowers are large semi-double rose pink with center petals often twisting. An upright grower with medium small roundish glossy green foliage.

Lily.—A medium sized white flower. They sometimes show a few stamens. Its bush is a fast, tall, compact grower with narrow light green leaves.

Marie Moren.—Double shell pink, medium size flowers with stamens in center. Fast, upright grower. Leaves are medium size and light green. Propogated from the Neville bushes in Monroeville.

Mathotiana Alba.—A large size, very double white with an occasional bloom of delicate pink and should have a shady location for best results. A compact, rapid grower with large, dark glossy green leaves.

Perfection Variegated. (Haemanthus)—A very loose peony form of rose pink blotched with shades of white, showing golden yellow stamens among the petals. A fast open habit of growth with medium green foliage.

Prince Frederick.—The flowers are medium size double red and white. A medium compact grower with dark green foliage. Leaves sometimes variegated with greenish yellow.

Sarah Frost.—The flowers are double rose red and a profuse bloomen, in mid-season. A hardy variety of medium fast growth and very compact with medium sized dark green leaves.

Warratah. (Honeycomb)—Very double, peony flowen. Resembles Prof. Sargent, but the guard petals are five in number and the center of the form is very tight like a comb of honey. A very fast, upright habit of growth with deep green leaves. A midseason bloomer.

USEFUL HINTS

Use Florida Volck one part to fifty for Scale Insect, White Fly and Red Spider.

Use Bordeaux Mixture sprayed on or Sulrote dusted on for all Fungus, Thrips and Mealy Bugs.

Use Aluminum Sulphate to correct soil acidity for growing Azaleas and other acid loving plants.

AZALEAS

The Azaleas are without doubt the most beautiful flowering plants in the South. Their season of blooming is very long and they are easily grown, if a few cultural suggestions are followed. Azaleas thrive in acid soil with plenty of leaf mold, pond muck or peat moss with plenty of water in partial shade. Avoid lime or alkaline soil and to correct this, use one and one-half pounds of Aluminum Sulphate to one wheelbarrow of soil.

The Indica group are fast growers and are well adapted to the Gulf Coast.

The Kurume and Hardy Japanese Azalas will stand much more cold than the Indicas and can be planted much farther north.

INDICA AZALEA

B-illiant.—A good grower with small dark green leaves. Deep watermelon color, being intermediate of Pride of Mobile and Pride of Dorking.

Criterion—Flowers are a delicate pink ground with white margin, striped with various shades, deep pink to red. A compact grower and a late bloomer.

Daphne Red—A late bloomer, with deep salmon-red flowers.

Daphne-Salmon—A hardy, mid-season bloomer with pleasing salmon color.

Elegance—A fast and rather upright grower, with light colored pink flowers in early Spring.

Formosa—Very fast grower with large, dark leaves and large lavender flowers.

George Franc—A compact grower with very large pink flowers. shading to red in the center. This variety blooms early. and has as much or more spread than height.

Glory of Sunninghill—Late. A hardy, bushy, compact grower with good foliage; free bloomer. Flowers of medium size. One of the best in this color.

Indica Rosea—Extra large flower of white with rose throat, early blooming. Fast grower, with large size hairy leaves.

Lady Edith—A deep pink with light margin, variegated much like Criterion with glossy leaves. A late bloomer.

Lateretia Alba—Medium size, pure white flower, late, small leaves, very compact growth.

March Bloomer—A light shining maroon red suffused with lavender. A good grower with light-colored leaves; blooming in March.

Maxwell—Large rosy red flowers, blooming late. Slow open growth and dull green leaves.

Moss Point Salmon—Compact grower, dark green foliage. Deep salmon flowers. Opening in mid-season.

Phoenicia—Fast grower with medium size flowers of purplish-pink. This variety will stand more heat and sun than others.

Praestantissima—a semi-hardy, compact, bushy grower with good foliage. Free flowering. Carmine red, blooms a week earlier than Prizle of Dorking.

President Clay—Good grower with orange-red flowers blooming in mid-season.

Pride of Mobile—Very hardy, fast grower, most brilliant color of Watermelon Pink, midseason bloomer.

Prince of Orange—Spreading grower, with deep orange-red flowers, after mid-season.

Rose Perfection—A beautiful, rich rose pink. Low-growing compact, symmetrical habit of growth. Free blooming and cold resisting.

Rose Red—A deep old rose overcast with light red. A hardy, compact, free blooming with fine foliage.

Vittata Fortunei—Early. A hardy, tall, open grower; very free blooming. Medium-sized, lavender and white flowers. Earliest and longest blooming variety.

HARDY JAPANESE AND KURUME AZALEAS

Benigiri—Fast, upright grower with large size single bright orange-red flowers.

Bridesmaid—Early. Bright salmon flowers in large clusters. Free flowering. The foliage is small and glossy green.

Christmas Cheer—Compact grower with small, shiny leaves. Deepest crimson flowers and one of the best variety.

Macrantha—Compact grower with roundish leaves with single medium size pink flowers late in season. Peachblow—Early. Single flowers of beautiful shade of peach-pink, and having ruffled edges. Hardy and very desirable.

Snow—Purest white, good size hose-in-hose flowers among beautiful glossy leaves. Liked by all.

Coral Bell—Compact grower with small, round, glossy leaves have dainty bell-shaped pink flowers.

Hexe (Firefly)—A Kurume hybrid of low dense compact habit. Flower large in size for this group. Pleasing crimson red. Semidouble, mid-season.

Hexe (Firefly)—A compact, tall grower with bright green leaves and prilliant, fiery single red flowers.

Hinodegiri—Most popular Japanese variety. Medium size single flowers of bright scarlet color. Leaves roundish, glossy green, very dwarf compact grower.

PERFECTION ROSES

For many years we have been engaged in growing Roses. Obviously, this has given us wide experience with plants and a knowledge of the varieties that are most popular and satisfactory to professional and amateur gardeners. Plants from our fields are growing and blooming in many of the noted Rose collections of America.

Every plant that we send out is two yars old, field-grown and free from disease. With even the slightest care they should thrive and bloom for years to come.

SIMPLE SUGGESTIONS FOR PLANTING ROSES

Setting a Rose propenly is an insurance against loss. The operation is simple, and can be carried out by anyone. Prepare the bed or border by spading 18 to 24 inches deep. Take out about half of the soil; with the remainder mix in about half its bulk of well-decayed manure. Then put back the top-soil and level it as far as possible. This work should be done a week or ten days before the plants arrive. When you receive the plants do not let them be exposed to sun or wind. Keep them covered to prevent drying out. Dig a wide hole, so that the roots may be spread apart, and deep enough to set the buld or joint just below the level surface. Cut off any broken or bruised roots; work the soil in and around the roots, and be sure they are well covered. Then partly fill the hole, tamping the soil to make it solid. Pour in three on four quarts of water and let it soak away; then fill the hole, packing all the soil except the top inch or more, which should be loose.

In severe climates protect the bed with a Winter mulch of leaves, litter, or straw, which must be removed in Spring. A Summer mulch of peat moss conserves moisture and keeps down weeds. Rose plants can be kept free from insects and most diseases by dusting or spraying. As a general thing dusting with sulphur dust is easier, more satisfactory and fully as effective. It may be applied in the morning when dew is on the foliage or after a shower.

Abbreviations Used: ...T—Teas; ...H. T.—Hybrid Teas; ...H. P.—Hybrid Perpetuals; H. W.—Hybrid Wichuraiana; Mult.—Mulitflora; N.—Noisette; Pol.—Polyantha.

YELLOW AND SALMON ROSES

Luxembourg. (H. T. Bush). A rich orangeyellow with creamy yellow tips. The most generally satisfactory yellow Rose for the South.

Lady Hillington. (T.) Beautiful long buds of golden yellow with no other shades.

President Herbert Hoover. It combines many shades of cerise-pink, flame, scarlet, and yellow, the long buds being beautifully formed.

Rev. F. Page Roberts. The inner face of the petals is a soft buff yellow, and the neverse a rich salmon, while the buds are often stained with copper-red.

Talisman. The coloring is truly marvelous, being a mixture of orange and yellow in irregular proportions, varying so much that no two flowers are alike. Fairly double.

Sunburst. (H. T. Bush.) Coppery yellow with golden orange in deeper shades immense buds, long and pointed.

Madam Butterfly. (H. T. Bush.) Indian ochre with yellow at the base and intermediate tones of clear brilliant shades of coral, opening into semi-double flowers.

Emily Gray. (H. W. Climber.) A new yellow rose with long buds and golden-yellow flowers that do not fade.

Climbing Perle des Jardins. (T. Climber.) In our opinion it is a better Rose than Marchal Neil, which it closely resembles. The new foliage is a beautiful wine-color. It is free booming.

Mary Wallace. (H. W. Climber.) A new, large very bright pink flower illumined with shining gold: cup-shaped. fragrant.

Cl. Pres. Herbert Hoover. Climbing sport of the bush variety.

Cl. Talisman. Climbing sport of the new multi-colored bush variety.

Rapture. (H. T.) Intensely brilliant in its vivid coloring of bright apricot, coral, rose and gold, the flower is of medium size.

Lady Margaret Stewart. Large, deep yellow flushed orange-red.

Joanna Hill. Very double; Indian yellow. Vigorous upright grower.

Olympiad. New, vivid scarlet with under tone of yellow.

Autumn. An outstanding new variety; burnt orange overcast with red, medium sized, double cupped, fragrant and free blooming.

Golden Dawn. A fine new yellow, very double, sunflower ageing to lemon, the bud tinged with rose.

Editor McFarland. Pink with yellow in profusion. vigorous, profuse bloomer.

Edith Nellie Perkins....Outside petals light cerise, inside salmon.

WE PAY POSTAGE

WHITE ROSES

Kaiserin Augusta Victoria. (T. Bush.) This is one of the most popular of the white roses, with large pointed buls.

Frau Karl Druschki. (H. P. Bush.) A beauty. Buds fine and large, usually pure white, but sometimes with a slight shading of pink on the outer petal. Extremely hardy.

Kilarney. (H. T. Bush.) Identical with the Pink Kilarney, of which it is an offspring except in colon, which is white.

White Radiance. (H. T. Bush.) A sport of the Radiance except in color, which is white. A very fine growing new rose.

Maman Cochet. (T. Bush.) Of the same habits as the Ping Cochet, but of pearly white shading to a most delicate pink.

White Maman Cochet. (T. Climber.) A fine strong-growing white climber, flowers and foliage of White Maman Cochet.

K. A. Viktoria. (H. T. Climbing.) Has the same good qualities as the bush variety listed under the whites, but is a climber.

Caledonia. Long buds and full flowers of pure white.

Silver Moon. Very effective, white with clear yellow stamens. Climbing.

RED ROSES

John Russell. A rich Crimson, shaded vel-

vety red, very large.

...

(H. W. Climber.) A American Beauty. strong, healthy, vigorous grower, a pleasing cerise-red.

Virginia R. Coxe. (T. Climber.) The reddest of the red roses-bright, dark and rich. Sweet-scented.

(H. T. Bush.) Virginia R. Coxe. called Gruss an Teplitz, one of the reddest of roses; heavy bloomer and very fragrant.

Reine Marie Henriette. (T. Climber.) It is one of the finest red climbers; the buds are cherry-red, large and pointed, and the large open flowers are no less beautiful. A very fine growing rose.

Etoile de France. (H. T. Bush.) Lovely shade of clear velvety crimson. Fine form buds borne on strong stiff stems.

Francis Scott Key. Red. shading to cerise, very large with a profusion of petals opening to a high center.

Red Radiance. (H. T. Bush.) Vigorous grower, very heavy bloomer, fragrant; long stiff stems; one of the best roses for the South.

scarlet-Sensation. (H. T.) Enormous crimson blooms of fine deep form; double very sweetly scented.

Climbing Red Radiance. A fine, strong growing red climber.

Etoile de Hollande. The brilliant red blooms hold well during hot weather, but are particularly good in the cool days of Autumn. Well known everywhere and seems to have few serious faults.

Paul's Scarlet Climber. (H. W.) A new addition to the red climbing roses. No other rose can compare with the brilliancy of the blooms of this rose.

E. G. Hill. Large lasting scarlet shading deeper as they develop.

Rocket. A wonderful rose for both garden display and for cutting. The brilliant cerise flowers are large, double, fragrant and freely produced on long stems.

PINK ROSES

Mrs. Chas. Bell. (H. T. Bush.) A vigorous grower and extremely free bloomer. In color it is a shell pink with salmon shading at the base of the petals, the most delicate of pink roses.

Pink Radiance. (H. T. Bush.) Finest pink rose we know. The buds are rather rounded, the flowers cup-shaped, a beautiful shade of soft carmine pink. Flowers very large, sweet-scented, borne on long stems, superb as a cut flower; a strong growing variety.

Pink Kilarney. (H. T. Bush.) A strong. sturdy, upright grower, the buds are exceedingly long and the flowers are a deep brilliant, sparkling shell pink; a constant bloomer.

Maman Cochet. (T. Bush.) Rose-pink, shading to a silvery hue. A splendid rose of good habits. Fine for cut flowers. Maman Cochet. (T. Climbing.) This rose is an exact counterpart of pink Maman Cochet except that it is a vigorous climber.

Climbing Cecil Brunner. (Pol.) A sport of the dwarf bush variety of this name. Rosypink on a rich creamy-white ground, shaded light salmon. A beauty.

Von Marshal. The same as pink Cochet except it is a very deep pink lasting well when full open.

Wilowmere. (H. T.) Superb buds and blooms of richest pink, shining with a yellow glow which seems to come from the heart of the flower. A very strong grower and a persistent bloomer.

American Pillar. (Climbing.) Flowers in great profusion. The color is bright pink.

Jonkeer J. L. Mock. (H. T.) Clear pink, under side of petals rosy; almost silverywhite blooms of large size.

Briarcliff. (H. T.) Dark pink. Richly colored, flowers of fine form, fine size, sweet scented, borne singly on stiff, almost thornless stems. Very popular Rose.

Climbing Pink Radiance. A fine, strong growing ping climber.

Climbing Columbia. Rosy-pink and a very free bloomer.

Marion Brunell Climber. (N.) A very desirable vigorous climbing rose with bright ping bloom and bright green leaves.

BROAD-LEAVED EVERGREENS

LET US PLAN AND PLANT YOUR HOME WITH THESE AND OTHER SHRUBS

Modern home-plantings cannot be considered as complete—or, hardly begun—if they do not contain a liberal supply of Broad-leaved Evergreens. They are needed for the green foliage which gives color all the year, especially in winter when warmth and color are demanded. There is need for them in all plantings, particularly in the outer living-room where they lay great claim to everyday beauty.

LIGUSTRUM (Privet)

Ligustrum Lucidum—A beautiful form of Japanese Privet. Leaves large, thick, and green. A most desirable variety in foundation plantings.

Ligustrum Pendulum. (Weeping Privet).

—New type of low spreading wax leaf Privet with small waxy leaves and long weeping branches.

Jasminum, primulinum—A graceful growing evergreen with pendant branches, dark green evergreen foliage, small yellow flowers in profusion.

Jasminum humile—A much branched evergreen shrub with compound dark green leaves. Bright yellow flowers in clusters.

18	to 24 in. P.R., postpaid\$.75

CONIFEROUS EVERGREENS

Every day in the year the Evergreens have an important place in the landscape picture. In summer, the foliage enriches the colors of shade trees and shrubs; in winter when days are dull and gardens sleeping, the Evergreens show their forms and color-tones in a most appealing fashion, and when the new growth breaks in spring we know that King Winter has retreated and that the "time of the singing of birds" is at hand.

To keep Coniferous Evengreens bautiful through the years, they should be fertilized annually. The best season is in March, just before the new growth begins. Well rotted manure is the best fertilizer to use. If this is not to be had, sheep manure and bonemeal are very satisfactory. Keep the soil loosened. If plants are in beds, these beds should be worked up at least 6 inches from the outside of the branches. If specimen plants, make a circle at least 12 inches outside branches of plant. Keep this free from weeds and grass.

Beckman's Golden Arbor-Vitae—A perfect gem for gardens, lawns and formal plantings; it is of dwarf compact symmetrical habit of growth with a very beautiful golden-yellow foliage.

DECIDUOUS and FLOWERING SHRUBS

Flowering shrubs give the finishing touch so much required by small and large homegrounds. When properly arranged, shrubs will soften the lines of the foundation, will provide an effective border or screen, will cover the edges of walls and screen objectionable views. Shrubs may also be used for covering slopes and for dividing the landscape into small sections, and for bordering the outdoor living room of small homes. A selection of varieties will give a succession of flowers from Spring until late Autumn and aften the foliage has fallen the brilliant berries and branches add color and cheer to the Winter landscape.

All of these advantages and many more will come from a proper selection of Flowering Shrubs, and a small investment will pay for itself many times over by increasing the value of your property and your satisfaction in ownership.

WIEGELA

Beautiful shrubs that bloom in April and May. The flowers are produced in so great profusion as to almost entirely hide the foliage.

Rosea—Flowers are a deep pink, and borne in great abundance.

Eva Rathke—Hardly as vigorous as some of the other varieties, but perhaps the most beautiful of all; flowers a deep, carminered.

Amabilis—A medium-growing Wiegela with excellent green foliage with flowers of deep-pink on outer edge of petals shading to a delicate light pink in the throat and borne in large clusters.

Floribunda—Vigorous growing; free flowering. Large rich crimson flowers and borne in great abundance.

Candida—Very beautiful green foliage; white flowers; blooms in the early Spring.

FRENCH HYDRANGEA

When given a rich, moist soil where they are protected from the sun, there is nothing more attractive than a mass planting.

PHILADELPHUS

Syringa or Mock Orange—Will be found highly desirable for growing with other shrubs; of strong vigorous growth. Blooms in early Spring, flowers of pure white.

18 to 24 in. P.R., postpaid \$.45 3 to 4 ft. P.R., charges collect .79

DEUTZIA

Pride of Rochester—Large, double white flowers tinged with pink; grows to good size specimens.

Deutzia Crenata—This new and exceptional Deutzia has beautiful large white flowers in great drooping panicles, blooming throughout the Spring-time.

FORSYTHIA or GOLDEN BELL.

Comes into bloom the first warm days of Spring; their masses of bright yellow flowers are borne before the leaves appear. One of theh first shrubs to bloom in Spring.

Fortunii—Of graceful upright habit, this variety is one of the best.

Intermedia—Bright, golden yellow, flowers on slender, arching branches, foliage a rich glossy green.

18 to 24 in. P.R., postpaid......\$.40

SYMPHORICARPOS

Coralberry or Indian Currant—A native shrub growing from New York to Texas, four to six feet tall; purplish red berries all produced in great profusion. They remain upon the plant all Winter, making it especially desirable for landscape planting.

Crepe Myrtle (Lagerstroemai Indica)—Favorite flowering shrub of the South; hardy and a heavy bloomer; it paints the landscape in Summer months with its brilliant blossoms in tones of red, white, pink, and

other colors. Frequently called the "Lilac of the South."

PERPETUAL BLOOMING SPIREAS

Spirea Anthony Waterer—A remarkable free flowering shrub with upright branches, leaves bright green with frequent variegation of yellow. If flowers are cut off as soon as they begin to fade, the plant will bloom the entire season. Very good for low-growing hedge or edging. Color red.

Spirea Reevisana—A compact branching shrub, 3 to 4 feet in height, producing a dense mass of pure white flowers.

Spirea Reevisana lanceata—The bush is more graceful than "Bridal Wreath" and blooming somewhat later. The flowers are very double white borne in large round clusters changing the bush into a white mass when in full bloom.

Spirea Billardi Alba—A tall growing variety; fowers white, produced in long, dense panicles; commences to bloom in May and lasts through the Summer.

Spirea Billardi Rosea—An upright shrub, reaching a height of 5 to 6 feet. Flowers pink in panicles 6 to 8 inches long A constant Summer bloomer.

Spirea Thunbergi—A low, bushy plant with small star-like white flowers in early Spring. Ideal for a low ornamental hedge or border.

Spirea Van Houtii—Branches long and arching, leaves dark green; flowers produced in clusters along the branches. This Spirea is often known as "Bridal Wreath."

Spirea Douglasi—A spreading grower with pink flowers in panicles 6 to 8 inches long. Ideal for a low ornamental hedge or border.

Three plants of any kind of Althea or	
Spirea, postpaid	1.10
Large, 4 to 5 feet, express collect	.75

SHADE AND ORNAMENTAL TREES

Protection from the sun is demanded in our Southern climate. Most of the Ornamental Trees provide such shade for the homegrounds, and their spreading branches shelter the passer-by on street and highway. They are needed as a border for the lawn and to frame the views from the windows of the house. Shade trees protect against high winds, furnish privacy to the home, and screen out undesirable views.

Grown in our nursery rows for a number of years, our Shade Trees are vastly superio.r in every way to trees which may be obtained from the woods and transplanted to the home grounds.

Magnolia and Grandislora—The grandest broad-leaved evergreen tree of the Southern forests. Leaves bright shining above usually coated with brownish tinge beneath; flowers large, beautiful, pure white, lemon scented, produced throughout the Spring months.

PALMS

Palms are among the most striking plants which may be used for outdoor Southern planting. Their bare, single trunk and huge, arching fronds distinguish them from all other plants. They always attract attention and give a decidedly tropical touch to the grounds. As street and shade trees, and in landscape plantings, they are excellent and worthy of extensive use.

Cocus Australis—A very beautiful, hardy Palm, with grayish-green, curved pinnate leaves. Deserves to be widely planted as it is one of the most desirable palms. Small, 75c; Medium \$1.15; 2 to 3 ft., \$2.50—Charges collect.

Chamaropo Excelsa—This Palm has a rather slender trunk and flat, fan-shaped leaves borne on slender stems. It is one of the hardiest varieties known and if any

Palm will stand the winters of a given section out-of-doors, it will. It reaches a height of about 15 feet. Well-grown specimens are particularly handsome and graceful, and where a Palm is desired for the small garden in the colder sections, it has no superior.

10 to 12 in. high, 8 to 10 leaves.......\$.60.
12 to 15 in. high, B&B, charges col..... 1.10

VINES

Vines are indispensible for many ornamental uses in your yard. They offer charm and beauty wherever they are used, often decorating barren, unsightly objects.

Perennial vines, once firmly established, continue to increase over a long period of years. Once they are properly planted and trained, they require very little attention.

WISTERIA (Wisteria Chinensis)

Purple—A very strong-growing sort, producing large panicles of purple flowers.

White—A very fine variety, with large clusters of delicately scented white flowers.
—Each 45c, postpaid.

Pink—Very rare variety. Clear pink to light pink, Raceme very long, it reaches very often over two feet. Vine grows very vigonous.—Each 90c, postpaid.

Coral Vine—(Mountain Rose)—A handsome vine with heart-shaped leaves, producing large racemes of rose-pink flowers; adapted to sunny locations—35c each, postpaid.

Ficus Repens (Climbing Fig)—Quite satisfactory for covering walls and foundations; small leaves and quite hardy—35c each, postpaid.

Bignonia Chamberlayni—For green house use—One of the finest and most beautiful

tropical climbers, flowering wonderfully in the house, a bright yellow. Should be in every vine collection.—35c each, postpaid.

Bignonia Radicans (Trumpet Vine)—A decidious climber with dark green leaves and brilliant orange trumpet-shaped flowers produced throughout the Summer, very hardy—45c each. Specimen \$1.00 postpaid.

Philodendron—A vine with wide, heart-shaped, glossy, dark green leaves. Very good for pots and boxes indoors; will grow in deep shade. 20c each, postpaid.

English Ivy—(Small-Leaf)—A favorite for rock garden and pool. It is very hardy and desirable for outdoor planting. 20c each.

English Ivy Variegata—A beautifully variegated Ivy with shiny green and white leaves for use in pots and wall containers. 25c each, postpaid.

Nowhere can bulbs be grown in greater variety than in the South and when provided with well prepared soil sufficiently rich, with good drainage and moisture, a profusion of blooms may be secured throughout the year.

Amaryllis Vittati—The flowers are very large and have a wonderful mixed color range from red to rose striped and variegated, they are unexcelled among bulb flowers. Blooming size, 45c; or 6 for \$1.25, postpaid.

WHITE SPIDER LILY (Caribaea)

This grand Lily forms large imposing clumps that are a mass of clustered heads of pure white fragrant flowers. 6 for 85c, postpaid.

CALADIUM

Fancy-Leaved Bulbs—These come in all the colors of the rainbow, making fine plants for separate pots, window boxes or vases. As Fancy-Leaved Caladiums are very tender to cold, we advise you not to plant before March, outside. 25c each; \$2.50 per dozen, postpaid.

Elephant Ears—Grows 4 to 5 feet plant with large green leaves; fine for background for pools and borders. 3 for 45c; 12 for \$1.60, postpaid.

TUBEROSES

Mexican Everblooming—Single pure white flowers, excellent for cut flowers; easily grown; very fraggant. 6 for 40c; 12 for 75c, postpaid.

Louisiana Wild Iris—This lovely Iris in mixed shades of violet and blue, should be planted in moist places where they reach their best growth and beauty; but if such places are not available, they should be given an abundance of water during flowering season. (They make the best showing when planted in beds, round ponds and pools or in water where they thrive. Growing three to four feet high.—3 for 75c, postpaid.

Creole Easter Lily—This majestic and charming Lily is a product of Louisiana and is the finest of all Easter Lilies. It is a strong grower with heavy cane-like stems and attractive dark green foliage. The gigantic, pure white flowers are of unusually heavy texture. Well-grown plants produce often 10 to 15 blooms to the stalk. Extremely showy grouped in front of shrubberies or planted in mixed borders.—3 for 55c; 6 for 85c; 12 for \$1.50, postpaid.

GLADIOLUS COLLECTION

Our Gladiola collection is proving so popular that we again offer it in the finest and latest creation, and for continuation of bloom through the season one should make several plantings at intervals of four weeks.

Betty Nuthall—Sparkling, iridescent, orange-pink; the throat golden orange lined carmine-rose; the reverse a lovely coral-pink.

Giant Nymph—Light pink with creamyyellow throat. A splendid cut flower type of large size and full spike.

Golden Dream—Fine deep yellow, very tall spike of strong substance.

Break O' Day—Light pink, with light salmon-pink throat, many open flowers at one time.

Alice Tiplady—Large orange; very popular wonderful cut flower.

12 for 50c; 3 dozen for \$1.40; 100 for \$3.50, postpaid.

Picardy—Light salmon apricot with deeper salmon feather. Wonderful in size and color. Without doubt the most prolific blooming Gladiola ever introduced. Its long stems make it indispensible as a cut flower

3 dozen \$1.90; 100 for \$2.50, postpaid

Gladiolus Mixture—Our special handmade assembly of choice listed varieties are fine blooming size bulbs.—50 for \$1.25; 100 for \$2.50, postpaid.

FERNS AND DECORATIVE PLANTS

Decorative plants have steadily increased in popularity during the past few years, and today play an important part in interior and exterior decorations. A few potted plants throughout the house in the Winter will lend a cheerfulness to the home which cannot be obtained in any other way. If these plants are carefully arranged in porch or window boxes through the Summer, they will add charm and grace to the outward appearance of the house.

Boston Fern. (Nepholepsis.) We have some beautiful specimens. The fronds frequently attain a length of five to six feet; gracefully drooping habit. It can be used as a house plant or under shade trees in Summer. This is a standard and most popular variety

Ostrich Plume—(Nepholepsis.) It has taken gold medals wherever shown, and is one of the most valuable ferns introduced in many years. The decorative fronds are made up of many leaflets that are finely divided, making it a charming fern.

Norwood Fern—New fern with a cast of blue that softens the green fronds finely cut, each pinna is crested giving a unique appearance. Becoming famous through the United States. Fine plants.

Exalta or Sword Fern—This fern is without doubt the most popular fern for the living room, being very showy and easy to grow. They are grown in pots on pedestals or in hanging baskets or window boxes.

Roosevelt (Nepholepsis)—There is no fern that will compave with this new and charming variety; it is generally like the Boston Fern, but produces many more fronds, making it bushier and more handsome.

Babys Breath Fern—This is the most delicate of all lace Ferns and really looks like filagree work. It is finer and more ornamental than any of the others. And makes a table fern par excellence.

All preceding Ferns—Fine Young Plants—3 for 45c; 6 for 85c, postpaid.

Feather Fern—(Asparagus Sprengeri)—A magnificent porch or basket plant in the South. The fronds or leaves grow four to five feet long. When cold weather comes it makes a splendid house plant and will succeed under most adverse conditions.

Lace Fern—(Asparagus Plumosa Nanus)—A tall climbing decorative plant and one of the rarest beauty. Its bright green foliage is extremely fine and plume-like. The fronds grow from 6 to 8 inches in width, and when cut retain their color and shape for weeks. Fine young plants, 6 for 70c, postpaid.

EVERLASTING BLOOMER or IMPATIENS

Sultani—Orange-pink flowers.

Red—A beautiful shade of red.

Brilliant—A fiery red.

Lilac—This is a beautiful shade.

2 for 35c—Postpaid.

LANTANA or SHRUBBERY VERBENA

Excellent everblooming bedding plant, affording a great variety of colors. They make splendid specimen plants for the lawn, porch box or urn. Their freeblooming has made them extremely popular. Colors: Pink-yellow; Pink-cream center; White; Red-orange center.—20c each, postpaid.

SAINTPAULIA

African Violet—Plants are dwarf, leaves like a Gloxinia, flowers beautiful blue like large single sweet-scented violet. 30c, postpaid.

GERANIUM .

S. A. Nutt—Crimson Red. This is the finest of dark crimson Geranium; has now taken the lead as a bedding Geranium.

Beauty Poitevine—Light pink. Beautiful shade of shimp pink. This variety is a universal favorite and deserves its reputation.

Ricardi—Vermillion. Most beautiful shade of bright vermillion. A grand variety.

Buchner—Pune White. The best white Geranium for all uses.

Geranium Prices: 3 for 50c, postpaid.

Jacobinia—(Pine Cone Geranium)—A very handsome plant with rose-pink bloom in dense terminals; large bright green leaves. Fine for pots and borders. Price 20c, post-paid.

GERBERA

(Transvaal Daisy)

Hybrids Mixed.—Dainty plants with graceful elegant, Margeunite-like flowers in delightful shades of red, cerise, salmon, orange, yellow and white carried well above the foliage on long slender stems.

Fine plants, 12 for \$1.60, postpaid.

Kalanchoe—A beautiful pot plant with small, waxy, dark green leaves and brilliant red flower clusters on long stems; very fine. Price 15c, postpaid.

COLEUS .

The Coleus is aptly called the gardener's paint box. We have a superb assortment of the most brilliant colors; fine for pots, bedding; used as bedding plants in parks and lawns everywhere.

Trailing Queen Coleus—Center of leaves bright red or pink with a broad border of emerald green; its long branches drooping gracefully in festoons two or three feet long, making a very showy plant for hanging baskets. 3 for 35c, postpaid.

MIXED COLEUS

Mixed Coleus for hanging baskets, porch boxes, borders and beds of the bush variety in a riot of colors. 3 for 35c, postpaid.

BOUGAINVILLEA

Bright festoons wonderfully along the walls in conservatories and sun rooms; or when trained on compact wire trellis forms, tubs on large jars.

Crimson Lake—This is one of the most notable vining plant introductions in years. Its numerous clustered, crinkly paper-like bells in their emerald setting are an incomparable brilliant crimson-like color. Medium size plants, 40c each, postpaid.

Glabra-Sanderiana—Large bellshaped flowers of lilac-rose borne profusely in terminal clusters all over the plant; blooms when quite small. Medium size, 40c, postpaid.

PANSIES

One of the most satisfactory plants. We have the choicest large flowering sort in an assortment of colors unsurpassed.

There is no flower more admired than the Pansy. Our assontment of colors embraces Striped, Spotted, Bordered, Fringed, Ruffled and Scalloped, in Rainbow colors, with rich velvety texture. 12 for 40c; 50 for \$1.25; 100 fon \$2.40, postpaid.

PERFECTION MAMMOTH VERBENA

Lucifer—Vivid scarlet, one of the best for porch boxes.

Mayflower—True pink. The tallest growing of the Verbena family.

True Beauty—Lavender. This is one of the most delicate in colors in the Verbenas. Admired by all.

12 for 40c; 100 for \$2.20, postpaid.

Double Fringed Petunias—These are large flowering, very double, finely fringed, petals fluted and crinkled giving high lights and shadow effects in a variety of colors; in short these petunias are unsurpassed by any others in the world. 3 for 45c, postpaid.

FLOWERING BEGONIAS

Alba Perfecta, or White Rubra—Medium long light green leaves; large trusses of pure white flowers with yellow stamens.

Coralline Luccerne—Wonderful new Begonia bearing immense flower clusters of bright coral red, changing to delicate pink. Every lady who has seen it in bloom has bought one.

Feastii or Beefsteak Begonia—Of spreading habit, leaves circular and of extra heavy texture, red underneath giving the effect of a beefsteak, glossy olive-green above. Flowers dainty coral-ned. Grown as easy as a Geranium.

Star Begonia—Very large leaves of a rich green with reddish markings, velvety surface; bloom is a magnificent pink borne in spray-like clusters lifted quite clear of the foliage.

Angel Wings Begonia—A very sturdy grower, with long pointed, thin green leaves drooping, giving them the appearance of angel wings bearing clusters of immense pink flowers with pink stamen. The best of the large growing Begonias.

Dorothy Grant—A new Begonia with deep pink flowers and glossy green, fleshy leaves; ned beneath; very desirable.

Grape Leaf Begonia—The edge of the leaf is green with a silvery sheen over the center and are reddish beneath. The bloom is a shell-pink on long stems.

Otto Hacker—Leaves are long, rather narrow, spotted with silver, and red beneath. Light red blooms in large clusters.

Wax Begonia—White bloom with light green leaves.

Red flowers with beautiful green leaves. Pink flowering with bright green leaves. Beautifully deep rose-pink with bronze-colored leaves.

All Begonias, 3 for 50c; 6 for 90; postpaid.

CHINESE HIBISCUS

This is one of the most striking and satisfactory shrubs, ranging in colors of pink, red and salmon shades. The plant is of quick growth and subject to frost injury, being cut down at about 28 degrees under ordinary conditions; still it has a strong power to recover, and will come on and bloom again in the Springtime as vigorously as ever, and is also fine as a tub plant. $2\frac{1}{2}$ in. pots—35c each, postpaid.

LANTANA—WEEPING

A plant of graceful weeping habit with profusion of lilac flowers, unsurpassed for baskets and porch boxes.

Lantana-20c each, postpaid.

Cleodendron—A viney plant with large cluster of white flowers with red center, a very satisfactory pot or tub plant, 35c, postpaid.

Allamanda—A climbing plant with golden yellow flowers about four inches across in clusters, very beautiful, 35c, postpaid.

Thunbergi or Sky Vine—A slender vine with spikes of lavender-blue flowers of trumpet-shape. 35c, postpaid.

Grand Duke Jassimine—A very double white flowening Jassimine very fragrant, leaves shiny green, 40c, postpaid.

Pothos Aureus—This handsome vine for sun parlor or porch boxes has yellow and green leaves; growing well in quite shady places. 20c each, postpaid.

Sanseviera Laurenti—A beautiful plant with gold band around the edge of leaf. Very beautiful. A new one. 25c and 35c each, postpaid.

FRUITS AND NUTS

PEACHES

Elberta—Large, yellow, with red cheek; flesh yellow, firm, juicy, of high quality. Exceedingly prolific, sure bearer and hardy. The standard market variety.

Hiley—Large, white with beautiful red cheek; flesh white; quality best. Prolific bearer, ripens June 25 to July 5.

Belle of Georgia—Skin white with red cheek; flesh white, firm and of excellent flavor, very prolific. Early September.

Carman—Large, creamy white, with deep blush; skin tough, but flesh tender and of fine flavor. A most profitable and popular shipping variety. Ripens June 20 to July 1. 18 to 24 in. 30c; 2 to 3 ft. 35c.

BERRIES

Boysenberry—A few of these plants will be the joy of your garden. This is the finest beary you have ever tasted, either fresh, canned, in jams, jellies or pies. The berry is a cross between Raspberry, Loganberry and Blackberry; very hardy and a very excellent flavor. They are very large and ripen later than Youngberry; very desirable.—6 for 75c or 12 for \$1.35, postpaid.

Youngberry—This berry is dark purple in colon and of superior desert quality. The large berries measure 3-4 to 1 1-4 inches long and 3-4 inch in diameter. One of the most satisfactory household fruits.

6 for 75c or 12 for \$1.35, postpaid.

JAPAN PERSIMMONS

Fuyugaki—Not astringent, light fleshed, edible while still hard, may be eaten like an apple. Medium size, rather flattened, very prolific.

Tamopan—Fruit large to very large, flattenexl oddly marked by construction about the middle; color golden red; fruit astringent until fully ripe; quality very fine, it makes a large tree.

Tane-Nashi—Large to very large roundish conical pointed, very smooth and symmetrical, skin light yellow changing to bright red; flesh yellow and seedless; quality very fine; vigorous, prolific, uniform size.

Triump—Medium tomato shaped; skin red; flesh yellow; generally has a few seeds very productive; quality best. 2 to 3 feet, 40c; 3 to 4 feet, 45c; 4 to 5 feet, 65c; 5 to 6 feet 90c.—Charges collect.

CRAPES

Carman—Large bunches, black berries, ripens evenly. Very popular.

Diamond—Early, ripening before Moore, white, with yellow tinge; juicy; few seeds, excellent quality.

Scuppernong—Muscadine type. Bunches composed of eight to ten very large berries, bronze-colored when fully ripe; flesh pulpy and sweet.

James—Very valuable. The largest of the Muscadine group, berries often measuring 3-4 to 1 1-4 inches in diameter; prolific; black, juicy, sweet. Has taken premiums wherever exhibited. Ripens from August until late in the Fall.

Thomas—Belongs to the Muscadine tyep, and one of the best of its class. Color reddish purple; pulp sweet, tender. Very largely planted. August and September.

All Grapes, 2-yr. Plants, 35c, postpaid.

PLUM

Excelsior—Fruit large, deep wine red with small pits, excellent flavor.

2 to 3 ft. 50c; 3 to 4 ft. 60c.

Stuart—Nuts large to very large, 1 1-4 to 2 inches long; oblong brownish shell; strongly marked with dark color. Shell of medium thickness and of very good cracking quality. Kernel full, plump, bright-colored. Heavy bearer. Gives satisfaction in many parts of the country and is being widely planted.

Success—Size large, oblong, tapering to the apex. Color reddish-brown, shell thin, cracking quality good, partitions thin; kernel large, full plump.

Lewis—The nut is of excellent quality and size, a good cracker and a heavy bearer. The tree is a strong rather upright grower. A pecan of excellent merits.

Kumquats, 30c and 35c—Charges collect.

The PINEAPPLE or SAND PEAR—The fruit is large and the flesh is crisp, and juicy; fine for cooking or canning.
4 to 5 feet, 45c.

5 to 6 feet, 55c

HOOD PEARS—Its fruit is large, very juicy, mellow, free from grit and quite acid in flavor.

2 to 3 feet, 55c;

3 to 4 feet, 75c

GRASS

SILVER PAMPAS GRASS

This beautiful grass makes large clumps and has immense plumes of silvery color often two feet or more long, lasting for many weeks. Very fine as individual plants. Strong clumps, 40c. Specimen clumps, 60c, charges collect.

CENTIPEDE GRASS

One of the very finest lawn grasses with narrow dark green leaves that grows fast and overs the ground with branching surface runners. The shady spots in your lawn can be satisfactorily covered as it grows well in full sun or shade.—Cuttings \$1.00 per bushel. Charges collect.

TERMS OF BUSINESS

Location: Office and Nurseries

FOLEY, BALDWIN COUNTY, ALABAMA, On the L. & N. Railroad.

INVITATION TO VISITORS—We take pleasure in showing our stock to persons interested.

TERMS:—Cash with order, if for immediate shipment. Orders for trees to be held for some weeks after the shipping season opens should also be accompanied by full payment. On orders booked in advance of shipping season, 25 per cent down, with the balance due when the shipping season opens. We do not care to ship C O. D. Add 2% Alabama Sales Tax to all orders for delivery within the State of Alabama.

REMITTANCE—To secure safety and prompt acceptance, remittances should be made by Bank Draft, Express or Post-Office Money Order, Registered Letter, Prepaid Express, or Certified Check. No postage stamps accepted.

SHIPPING DIRECTIONS—Kindly indicate whether shipment is to be made by freight or express; otherwise we will use our best judgment, in the interest of the customer.

TRANSPORTATION AT PURCHASER'S RISK and EXPENSE—Our responsibility ceases upon delivery to forwarding companies. Claims for losses or damage must be made upon the latter. We will, however, start a tracer for delayed shipments, if notified, and use every means at our command to secure prompt delivery, or recovery in case of damage or loss. All freight and express charges are to be paid by purchaser.

WE PAY THE POSTAGE

SHIPPING AND PLANTING SEASON.—November to March for all trees and shrubs grown in the open field. Balled and pot-grown plants may be shipped at any time. Shipments from March to November should go by express or post. Prices in this catalogue cover the shipping season of 1940 and 1941 ending first of May, 1941.

SUBSTITUTION.—Substitution of varieties will not be made without permission from customers. Labels attached to everything sent out.

WE GUARANTEE all stocks sent out to be well rooted, well grown, true to name, properly packed, and shipped according to instructions. Our liability under the foregoing guarantee is limited in amount to the original price received.

CLAIMS.—If, by any possibility, errors should occur they will be promptly rectified, if claim is made within five days after the receipt of the goods.

These prices are subject to change without notice.
